research experience .

**Ar.Ganga Krishnan, Landscape Architect**  
National EC Member, ISOLA

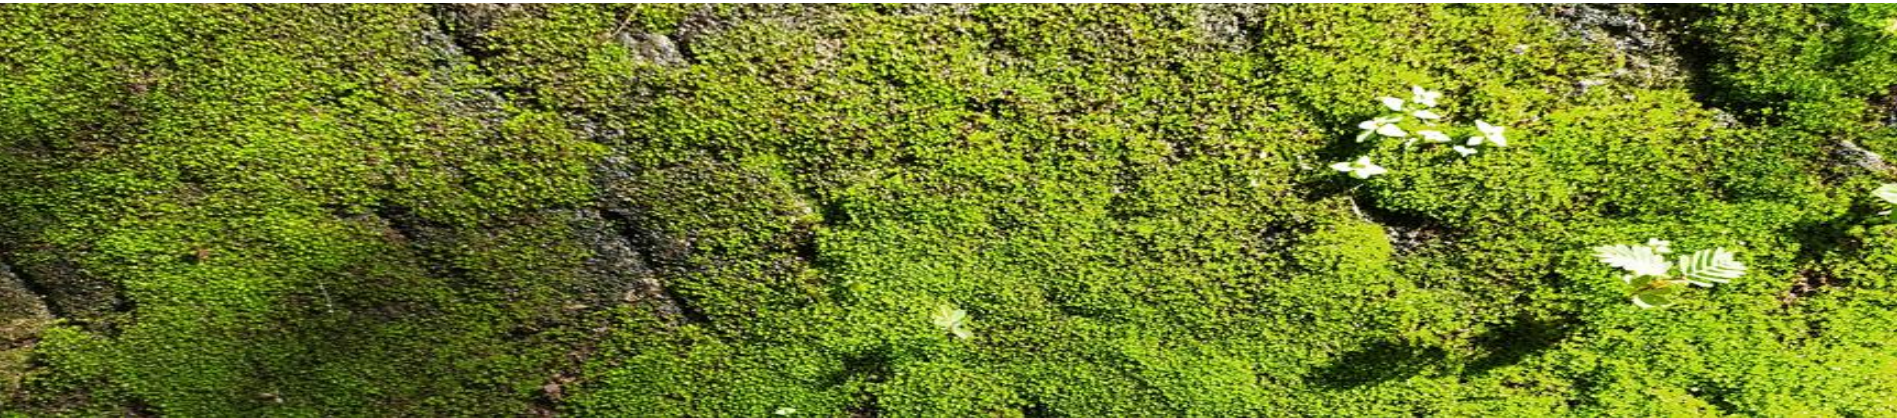

# Site Documentation Team

2<sup>nd</sup> Year B.Arch.students of MCAP

## **Landscape is a profession which**

addresses the changing relationship of man and environment  
Traditional cities, governed by socio cultural values and  
wisdom were self-sustainable and rendered qualitative  
experience to the people.

The role of the landscape architect transcends boundaries,  
in integrating intangible values of culture, people, places, land,  
water, air, context and site-specific conditions  
into ecologically healthy places to meet present and future  
challenges.

The self-healing capacity of natural systems is becoming severely threatened.

**Thank you all....**

Be proactive...Join our hands Together
